The Department of Toxic Substances Control (DTSC) wants to let you know of the investigation findings and proposed determination of no further action for the Anthony International facility located at 12812 Arroyo Street in the city of Sylmar. These findings are included in a report known as a Preliminary Endangerment Assessment (PEA). Anthony International has operated at this site since 1960. The facility consists of ten buildings with seven street addresses and is located in a light industrial area of the northeastern area of the San Fernando Valley approximately 1,000 feet northeast of Interstate 210.

The facility manufactures refrigerator/freezer doors and uses several hazardous chemicals to treat the glass used in the doors it makes. The facility is authorized to operate a Permit By Rule (PBR) unit at the site to treat the wastewater being generated from the glass treatment process. The PBR was granted to the facility in October 1993.
